DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 33,34,42 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rheault et al. in view of Wussow et al.

Rheault et al. discloses the claimed invention, including a steering sensor **310**, and electronic control system **300**, a watercraft speed sensor **320** and a throttle position sensor **330**. Rheault et al. fails to disclose a remotely positioned stepper motor for operating the throttle.

Wussow et al. teaches same.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a stepper motor throttle control to Rheault et al. as taught by Wussow et al.

Such a combination would have been desirable at the time of the invention so as to provide a compact motor assembly which provides little interference with other engine components.

3. Claims 35,36,38 and 44-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rheault et al. in view of Wussow et al, as applied against claims 34 and 43 above, and further in view of Mukumoto.

Application/Control Number: 10/812,290

Art Unit: 3617

Rheault et al. fails to disclose the storing of throttle position data within the ECM, however such is considered to have been notoriously old and well known in the art as evidenced by Mukumoto.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide stored values of various operating conditions within the ECM of Rheault et al. as is known in the art, and as taught by Mukumoto.

Such a combination would have been desirable at the time the invention was made so as to provide for efficient operation absent feedback.

4. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rheault et al. in view of Wussow et al. and Mukumoto, as applied against claim 35 above, and further in view of in view of Bernier et al.

Rheault et al. fails to disclose a timer.

Bernier et al. teaches same.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a timer to Rheault et al. as taught by Bernier et al.

Such a combination would have been desirable at the time the invention was made so as to provide maintenance of control for a period of time after throttle is cut.

5. Claims 47 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rheault et al. in view of Wussow et al. as applied to claims 33 and 42 above, and further in view of Kolberg.

Rheault et al. fails to disclose a notoriously old and well known throttle valve shaft pulley and cable arrangement.

Page 4

Kolberg teaches same.

It would have been obvious to one of ordinary skill in the art at the time of the invention to attach cable to the shaft of Rheault et al. as taught by Kolberg.

Such a combination would have been desirable at the time of the invention so as to provide reliable and accurate control.

- 6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 571-272-
